Special Exhibition of Taiwan's Exotic Fishing Villages

簍、石滬等傳統漁業的知識與技能，
。二戰後，漁業復興，創造臺灣漁業的匱乏，政府推動休中再生，並為地球

會特舉辦「年年有希望透過臺灣漁港、，讓大家更加了解，更感受海洋的豐饒我們的漁村與海

Early years ancestors used traditional methods such as bamboo raft, creel, and stone tidal weir to catch fish, and after Japanese introduced modern knowledge and skills in fisheries, fisheries in Taiwan gradually became advanced. After World War II, the recovery of fisheries progressively developed deep-sea fisheries and aquaculture, creating the miracle of Taiwan's fisheries. In 21st century, facing the shortage of fishing resources, the government promotes recreational fisheries that revives fishing villages and dedicates its effort to the sustainable fisheries.

Yang Ming Cultural Foundation holds the special exhibition "Fishery Years-Taiwan's Exotic Fishing Villages", in hoping of people learn about culture of fishing villages and fisheries in Taiwan through displays of fishing harbors, fishing boats, cuisines, and relics, and further recognize the rich and crisis of the ocean that in a way to cherish our fishing villages and the ocean and ultimately to have prosperous years after years.

許未來一個藍色海洋 Promise Future a Blue Ocean

以前人們認為海洋浩瀚無垠、恢復力強，漁業資源不會枯竭。現在由於過漁、棲地破壞、污染等人為因素的破壞，再加上全球暖化造成全球環境失衡，已使得漁業資源持續匱乏。保護我們的海洋，進而保護我們未來的生存環境，珍惜地球資源，就請你我從現在開始做起。

It was thought that the ocean was vast and resilient, and that fishery resources would not be depleted. Now due to the destruction of human factors such as overfishing, habitat destruction and pollution, coupled with the global environmental imbalance caused by global warming, the fishery resources have been continuously in deficiency. To protect our oceans and future living environment, we should cherish the earth's resources right now.
